

## Project Design Phase-I

### Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID13322
Project Name	Project – University Admit Eligibility Predictor
Maximum Marks	2 Marks

### Proposed Solution

S.No.	Parameter	Description
1.	<b>Problem Statement</b>	Statistically, after completing schooling, the students are facing problems while choosing the university and they don't have much of an idea about the procedures, requirements and details of the universities, they seek help from the education consultancy firms to help them successfully secure the admission in the universities which are best suitable for their profiles. For this, they have to invest huge amount of money as consultancy fees.
2.	<b>Solution description</b>	The main objective of this project is to help the students to save their time and money that they have to spend at the education consultancy firms and also provide a accurate prediction of admission using parameters like GRE etc.
3.	<b>Uniqueness</b>	Students get immediate and accurate results on their admission by providing their details. It helps them to identify their dream university with less effort.
4.	<b>Social Impact</b>	It helps student in making the right decision for choosing the universities. It cuts the cost of consultancy services by creating a direct connection between students and universities.

<b>5.</b>	<b>Business Model</b>	Universities are under immense pressure to admit more students and ensure student success. To overcome this pressure, they can make use of predictive models which help them to ease the intake process of students and improve efficiency
<b>6.</b>	<b>Scalability of the Solution</b>	This solution includes the status of application and list of universities that is eligible for students profile by applying various ML models.
